## Zachary Community Schools School Nurse Department

Welcome to Zachary Community Schools. We are excited that you have chosen our school system, which is one of the fastest growing, top-rated districts in the state, to educate your child.

In order to provide the best care possible for your child while at school, it is important for us to be aware of any medical conditions that might affect them during school hours or any condition that requires medication or possible nursing assistance (e.g. asthma, seizure disorder, diabetes, severe allergies, etc.). If your child does not have any medical issues or does not require any medication at school, we only need your signature on the "HIPPA Policy" form to be returned to school.

If your child has special medical needs, please complete and sign the enclosed forms. In addition, if your child requires medication at school, you may pick up the state mandated medication packet at your child's school or you may download these forms from the district website ([www.zacharyschools.org](http://www.zacharyschools.org)) Go to top of the page to Departments>Academics>Student Support Services>School Nurses. Find the Medication packet on the left-hand side of the screen. Complete the form and return to your child's school. A parent will have to bring the medication to school to be checked and logged in. **Please note that medication of any kind, including over-the-counter medication, may NEVER be sent to school with your child and MUST be checked in by a parent along with the medication packet completed.**

Also, please ensure that your child's immunizations are up-to-date, and that his/her school has an updated copy. This is required by Louisiana Department of Health and Hospitals and must be on file for your child to attend school.

Thank you in advance for your cooperation. We look forward to caring for your child.

## NOTICE OF USE OF PERSONAL HEALTH INFORMATION

This notice describes how medical information about your child may be used and disclosed and how you can get access to this information. Please review it carefully:

We understand that any information we collect about your child and their health is personal. Keeping your child's health information private is one of our most important responsibilities. We are committed to protecting their health information and following all laws about its use. You have the right to discuss your concerns with the system's Privacy Officer about how their health information is shared. The law says:

1. We must keep student's health information from others who do not need it.
2. You may ask us not to share certain health services information with others. However, occasionally certain situations prohibit us from complying with a request as such.

Your child may receive certain services from nurses, therapists, social workers, doctors, or other health-care related individuals. They may see, use, and share your child's health or medical information to determine any plan of treatment, diagnosis, or outcome of the said information as described in an Individualized Education Program (IEP) or other plan document. This use may cover such health services your child had before now or may have later.

We review such health services information and claims to make sure that you get quality services and that all laws regarding providing and paying for such health services are followed. We may also use the information to remind you about services or to inform you about treatment alternatives. In addition, we may also use the information to obtain payments for such services as a result of the Medicaid program. We must submit information that identifies you and your child, your child's diagnosis, and the type of services provided to your child for reimbursement by Medicaid.

We may share your health care information with teachers through health plans, with insurance companies and/or government programs in order for our school system to be reimbursed for such health care or medical services rendered during the school day.

As a general rule, you may request to see your child's health information. However, the request may not include psychotherapy notes or information being gathered for judicial proceedings. There may be legal reasons or safety concerns that would limit the amount of information that you may see. You may ask in writing to receive a copy of your child's health information. We may ask for payment for copying costs.

If you suspect some of your child's health information is wrong, you may ask in writing that we correct or amend it and you must provide the appropriate documentation, if applicable, from your child's physician in order to verify it.

You may request in the form of a signed 'Authorization of Release of Information' that any health information be sent to others who have received your child's health information previously from us. In addition, you may also request a comprehensive list of any recipients of such information. At any time, you may stop or limit the amount of information being shared by informing us in writing.

Note: A child 18-years old or older can give consent for his or her health information to be shared by signing an 'Authorization of Release of Information'.

In certain situations, we are mandated to abide by laws pertaining to sharing particular health information regarding your child, even if an 'Authorization of Release of Information' is not signed. We always report:

1. Contagious diseases, birth defects, and cancer;
2. Firearm injuries and other trauma events;
3. Reactions to problems with medicines or defective medical equipment;
4. To the police or other governmental agencies when required by law;
5. When a court orders us;
6. To the government to review how our programs are working;
7. To Worker's Compensation for work related injuries;
8. Date of birth and immunization information;
9. Abuse, neglect, and domestic violence, if related to child protection or vulnerable adults; or
10. To parents and other designated by law.

We may also share health care information for permitted research purposes and for matters concerning serious threats to public health or safety. Furthermore, if the health information falls within the FERPA definition of "education record", it will not be considered private health information under HIPAA, and therefore, will not be regulated by HIPAA.

If you have any questions about this notice of privacy rights or feel that such rights have been violated, you may contact:

Zachary Community School Board Office  
(225) 658-4969 telephone  
3755 Church Street, Zachary, LA 70791

You can also complain to the federal government Secretary of Health and Human Services (HHS) or to the HHS Office of Civil Rights. Your health care services will not be affected by any complaint made to the Zachary Community School Board, Secretary of Health and Human Services, or Office of Civil Rights.

You may ask for additional copies of our HIPAA policy at any time. The following link provides additional information regarding HIPAA and FERPA relevant to student health records.

## ZACHARY COMMUNITY SCHOOLS IMMUNIZATION REQUIREMENTS FOR PRE-K/KINDERGARTEN

Under State Law (Act no. 771) all students are required to have proof of immunization. We must have an up-to-date copy of your child's immunizations before school starts.

DTaP----- 5 Doses  
IPV-----4 Doses  
MMR----- 2 Doses  
VAR----- 2 Doses or history of having chicken pox  
HepB----- 3 Doses

### **\*\*\*IMPORTANT\*\*\***

We are required by the Department of Health and Hospitals to use Louisiana Immunization Network for Kids Statewide (LINKS) web application for recording and reporting all student immunizations. Please note, any immunization given too early or out-of-sequence will be identified as invalid by LINKS and will need to be repeated. If your child's physician chooses not to repeat the said dose, documentation from the physician is required by the Department of Health and Hospitals to include in our records.

Please contact your child's school to speak with a school nurse if you have any questions regarding immunizations.

Thank You,

(1) Entry requirement exception for students who are 4 years of age when entering kindergarten at start of school year. To attend kindergarten in Louisiana, students must be 5 years old by September 30 each school year. Therefore, there are instances where a student is still 4 years old when entering kindergarten. In these instances, the 4-year-old student may be admitted into kindergarten so long as a parent/guardian presents a record indicating that the student is in progress of receiving the required vaccinations. In these instances, follow-up from school staff must be provided for compliance with the above requirements.  
 (2) Those students who received their 4<sup>th</sup> dose of DTaP at age 4 or older do not need a 5<sup>th</sup> dose on record.  
 (3) Those students who received their 3<sup>rd</sup> dose of IPV at age 4 or older do not need a 4<sup>th</sup> dose on record.

**COVID-19** - Vaccines for severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). Vaccination is recommended for children 6 months and older and series and intervals depend on vaccine type.

**DTaP** - DTaP vaccine is recommended to be administered any time after 6 weeks through 6 years of age. The 4<sup>th</sup> dose of DTaP should be given at least 6 months after the 3<sup>rd</sup> dose. Pediatric DT (Diphtheria-Tetanus) should be substituted for DTaP when Pertussis vaccine is contraindicated. Persons aged 7 and older who are fully immunized with DTaP should receive a Tdap at 11-12 years in place of Td booster.

**Td/Tdap** - Persons aged 7 years and older who are not fully immunized with DTaP vaccine should receive Tdap vaccine as 1 (preferably the first) dose in the catch-up series; if additional doses are needed, use Td vaccine. For children 7 through 10 years who receive a dose of Tdap as part of the catch-up series, an adolescent Tdap vaccine dose should be administered at age 11 through 12 years. Td should be administered instead 10 years after the Tdap dose. Adolescents 13-18 years who missed the 11-12 year Td/Tdap booster should also receive a single dose of Tdap if they completed the recommended childhood DTaP series. No minimum interval required between giving doses of Td and Tdap. Subsequent routine Td boosters are recommended every 10 years. If a Tdap dose is administered at age 10 or older, the Tdap dose may count as the adolescent dose.

**Flu** - Routine annual influenza vaccination is recommended for all children 6 months-18 years. 2 doses administered at least 1 month apart are recommended for children aged 6 months-8 years who are receiving the influenza vaccine for the 1<sup>st</sup> time. Children 6 months through 8 years getting vaccinated for the 1<sup>st</sup> time, and those who have only previously gotten 1 dose of vaccine, should get 2 doses of vaccine. All children who have previously gotten 2 doses of vaccine (at any time) only need 1 dose of vaccine each season.

**HepA** - Routine Hepatitis A vaccination is recommended for all children 12 months through 18 years of age. The 2 doses in the series should be administered at least 6 months apart. If the interval between the 1<sup>st</sup> and 2<sup>nd</sup> doses of Hepatitis A vaccine extends beyond 18 months, it is not necessary to repeat a dose.

**HepB** - Unimmunized infants should be given a 1<sup>st</sup> dose of Thimerosal-free HBV at the birthing hospital before discharge or when first encountered, a 2<sup>nd</sup> dose a minimum of 1 month later, and a 3<sup>rd</sup> dose a minimum of 4 months after the 1<sup>st</sup>. Children aged 11-18 years of age who have not previously received 3 doses of Hepatitis B vaccine should be vaccinated. The 2<sup>nd</sup> dose should be administered at least 1 month after the 1<sup>st</sup> dose, and the 3<sup>rd</sup> dose should be administered at least 4 months after the 1<sup>st</sup> dose and at least 2 months after the 2<sup>nd</sup> dose. The minimum age for the 3<sup>rd</sup> dose is 6 months. Hepatitis B vaccine is routinely recommended for all children up to 19 years of age.

**Hib** - Hib vaccine can be administered any time DTaP vaccine is given. If PRP-OMP (PedvaxHIB [Merck]) is administered at 2 and 4 months of age, a dose at 6 months is not required. Children who are 7 months of age or older at the time they receive the 1<sup>st</sup> Hib vaccination should be immunized as follows: (1) Unimmunized infants 7-11 months of age should receive a 3-dose regimen. A 1<sup>st</sup> dose should be given now, a 2<sup>nd</sup> dose 1 month later, and a 3<sup>rd</sup> dose after 12 months of age, at least 2 months after the previous dose. (2) Unimmunized children 12-13 months of age should receive a primary series of 1 dose and a booster at age 15 months. (3) Unimmunized children 15 months of age or older who have not yet reached their 5<sup>th</sup> birthday should receive 1 dose.

**HPV** - HPV vaccine is a 2-dose series for ages 9-14 years and a 3-dose series for ages 15-26 years. Administer the 1<sup>st</sup> dose of HPV vaccine between 11-12 years. Administer the 2<sup>nd</sup> dose 6-12 months after the 1<sup>st</sup> dose. If the series was started at 15-26 years, then a 3-dose series is required: 4-week minimum interval between dose 1 and dose 2. A minimum interval of 12 weeks required between dose 2 and dose 3. The 3<sup>rd</sup> dose should be given at least 24 weeks after the 1<sup>st</sup> dose. Adolescents aged 9-14 years with 2 doses of HPV vaccine less than 5 months apart, require a 3<sup>rd</sup> dose.

**IPV** - For infants, children and adolescents up to 18 years of age, the primary sequential series of IPV consists of 4 doses. The primary series is administered at 2 months, 4 months, 6-15 months and 4 years of age, or as age appropriate. A minimum of 6 months is required between the last 2 doses of IPV. A 4<sup>th</sup> dose in the routine IPV series is not necessary if the 3<sup>rd</sup> dose was given at 4 years of age or older and 6 months or more after the previous dose.

**MMR** - 2 doses of MMR vaccine after 12 months of age are required with a minimum of 28 days separating the doses. If a child has received 2 doses of MMR vaccine after 12 months of age, another dose after the 4<sup>th</sup> birthday is not necessary. Children 11-18 years of age not previously immunized with MMR should receive 2 doses. Individuals with 1 dose of MMR must receive an additional MMR vaccination. Students in schools of higher learning must receive 2 doses of MMR prior to entry.

**MenACWY** - Meningococcal conjugate vaccine should be administered to all children at age 11-12 years, a booster dose on/after 16 years. The minimum interval between doses of MenACWY vaccine is 8 weeks. Only 1 dose is needed if first dose given on or after age 16. This vaccine provides protection against meningococcal serogroups A, C, W, and Y, but not against serogroup B.

**MenB** - Teens age 16 through 18 years may be vaccinated routinely as an Advisory Committee on Immunization Practices Category B recommendation for provider-patient discussion. The 2-dose series protects against serogroup B meningococcal disease, but not serogroups A, C, W and Y. The 2 MenB vaccines are not interchangeable. The same vaccine product must be used for all doses in a series. Give 2 doses of either MenB vaccine: Bexsero, 1 month apart; Trumenba, 6 months apart. If dose 2 of Trumenba is administered earlier than 6 months, administer a 3<sup>rd</sup> dose at least 4 months after dose 2. For special situations use the Bexsero 2-dose series at least 1 month apart or the Trumenba 3-dose series at 0, 1-2, and 6 months.

**PCV** - All children should receive a 3-dose primary series and a booster if vaccination begun at ≤ 6 months of age; a 2-dose primary series and a booster if vaccination is begun between 7 and 11 months of age; a 2-dose series and no booster if vaccination is begun between 12 and 23 months of age. If vaccination is initiated at ≥ 24 months of age, the child should receive 1 dose of PCV. Children 24 through 59 months of age should receive a single dose of PCV13. For children with underlying medical conditions, a single supplemental PCV13 is recommended following primary series. High risk or presumed high risk for pneumococcal disease should be immunized with Polysaccharide Vaccine (PPSV) depending on the number of doses of PCV that they have received. PCV vaccination is required as part of the Daycare/Head Start Immunization Requirement for children less than 24 months of age.

**RV** - The 1<sup>st</sup> dose should be given between 6 and 14 weeks with the maximum age of 1<sup>st</sup> dose being 14 weeks 6 days of age. Maximum age for any dose is 8 months of age. Minimum interval between doses is 4 weeks. Monovalent RV1 is administered at 2 months and 4 months of age, a dose at 6 months is not required. Pentavalent RV5 is administered at 2 months, 4 months and 6-8 months. If RV brand is unknown a total of 3 doses are needed.

**VAR** - All susceptible children who are at least 12 months old through 18 years of age should be vaccinated. Administer the 2<sup>nd</sup> dose of varicella vaccine at age 4-6 years. VAR vaccine may be administered prior to 4-6 years, provided that 2-3 months have elapsed since the 1<sup>st</sup> dose and both doses are administered at ≥ 12 months of age. Susceptible persons aged ≥ 12 years should receive 2 doses at least 1 month apart. Children with a history of typical chickenpox are assumed to be immune to varicella and serologic testing is not warranted. History of chickenpox is not a contraindication to VAR vaccination.
